- **Major:** Bachelor of Science in Computer Science; **Minors:** Business, Entrepreneurship Austin, TX
- **Relevant Coursework:** Computer Architecture, Data Structures, Linear Algebra, Intro to Statistics and Probability

TECHNICAL SKILLS

- **Proficient:** C, JavaScript, Java, React, Vue 3, NodeJS, SQL, HTML5, CSS, SCSS
- **Intermediate:** TypeScript, Excel, PHP, C#, ASP.NET, Python, C++, VBA, Kotlin

WORK EXPERIENCE

ATMOSPHERE TV, *Software Developer Intern*

May - August 2022

- Developed a custom component library from scratch and implemented automated testing using Vue 3, TailwindCSS, and StorybookJS for the internal and customer portals, and company website.
- Migrated, replaced, and rewrote 10+ libraries utilized in the customer portal from Vue 2 to Vue 3 JavaScript framework.
- Owned implementation of two consumer interaction analytics tools for the customer portal using an in-house analytics API, Hotjar, BigQuery, Looker, and Google Optimize.

IEDUCATE USA, *Systems & Data Intern*

June - August 2021

- Developed a web-app that aids in the cataloguing and ingestion of captured content, using Google Drive and Forms.
- Performed fit-gap analysis on the operations workflow to capture pain points and areas of improvement.

RADIX ENGINEERING AND SOFTWARE, *Software Engineering Intern*

July - August 2019

- Saved ~\$52,000 annually by developing computer-based invoice matching tool in Excel using VBA, automating the hour allocation calculations, and creating a web-admin site using ASP.NET, C#, and SQL.

ENTREPRENEURSHIP

TALEMNA, *Co-Founder*

June 2022 – Present

- Creating a mobile-first website utilizing React, TypeScript, and Firebase to connect tutors and students in Saudi Arabia.
- Implementing i18n to support both English and Arabic on the website to improve accessibility for all users.

FLOOD ALERT, *Founder*

February 2017 – May 2021

- Developed a [web application](#) using Bootstrap, Firebase, and Google Maps to help people navigate through the safest route in flooded zones by crowdsourcing information.
- Invented a flood sensor to collect real-time and location-specific water level measurements with integration to the web application. Used C++ and the REST API to develop and connect this sensor to the database.
- Pitched the system at the 2nd annual [Texas STEAM Summit](#) 2017 featuring MIT, to the Houston City Council Members.

SPEEDELIVERY, *Co-Founder, Lead Web Developer*

March 2020 – May 2020

- Founded a zero-cost grocery delivery service and programmed a [website](#) using Bootstrap and Firebase for at risk-individuals; delivered \$400 of products to 20 households.

LEADERSHIP

Freetail Hackers, *Internal VP, Merge Project Lead & Events/Experience Member*

February 2022 – Present

- Leading a team of 6 to develop a team-matching app for hackathons using Mongo DB, Express, React, and NodeJS. Improved the DevOps for the team by setting up a CI/CD pipeline, unit testing, and pre-commit hooks.
- Planning and elevating the hacker experience at HackTx 2022, a 600+ attendee hackathon.
- Planned and successfully ran the Longhorn Hack For Humanity Spring Hackathon for 200+ attendees.

Mu Alpha Theta, *President*

August 2018 – May 2021

- Raised \$1500 in scholarships by leading the 5-person leadership team to organize multiple events and fundraisers.

INTERESTS /AWARDS

- **Golf:** TAPPS Golf State Tournament – 3rd Place May 2021
- **Teaching:** Taught Math and Computer Science to 40 underserved middle school students June – July 2020
